PROFILE

NOC and network monitoring professional with hands-on experience in 24/7 infrastructure monitoring, first-level troubleshooting, and incident ticket management across ISP and enterprise environments. Skilled in tracking network, application, and cloud service health, escalating incidents through defined workflows, and coordinating with technical teams to restore service quickly. Comfortable working shift-based schedules in fast-paced operations centers.

WORK EXPERIENCE

NOC Support / Network Operations Center (NOC) Manager — ISP

LIPTINFOR Niger SA — Niamey, Niger

Oct 2024 – Current

- Perform continuous first-level monitoring of ISP network infrastructure, including routers, switches, fiber optic links, and international connections, within a 24/7 NOC.
- Detect, log, and manage incidents using Jira, tracking each ticket from identification through escalation and resolution.
- Analyze network performance metrics using PRTG to identify bottlenecks and optimize bandwidth allocation before they impact clients.
- Coordinate troubleshooting and escalate incidents to the appropriate technical teams to minimize downtime and meet service-level targets.
- Apply preventive maintenance measures and follow up on scheduled tasks to improve overall network reliability.
- Prepare daily performance and incident reports, providing management with clear visibility into system health and recommendations for improvement.
- Communicate directly with clients to verify service quality, resolve complaints, and maintain high customer satisfaction.
- Lead and coordinate a small NOC team, organizing shift coverage to ensure uninterrupted 24/7 monitoring.

Network & Security Intern

Banque de Développement Local — Algiers, Algeria

13/05/2024 – 13/06/2024

- Monitored network and email security events using FortiSIEM and FortiMail, supporting early detection of security incidents.
- Supported basic cloud service checks and configuration tasks using AWS as part of infrastructure security exposure.
- Completed a final-year project on strengthening network infrastructure security within a live enterprise environment.

EDUCATION

Bachelor's Degree in Computer Science, Specialized in Network Infrastructure and Cybersecurity

Numidia Institute of Technology — Algiers, Algeria

07/09/2021 – 05/07/2024

Level in EQF: 6

CERTIFICATIONS

- CCNA: Introduction to Networks — Cisco Networking Academy (2023)
- Introduction to Cybersecurity — Cisco Networking Academy (2023)
- Cybersecurity Essentials — Cisco Networking Academy (2024)

SKILLS

Monitoring & Ticketing: PRTG, Jira (incident/ticket management), FortiSIEM, SIEM log analysis

Networking: Routing & Switching (BGP, OSPF, MPLS), Firewall Configuration, IDS/IPS, Snort

Cloud & Systems: AWS (basic), Linux Administration (Ubuntu, Kali, Parrot OS), Docker (basic), SDN/NFV Fundamentals

Programming: Python, C, Java

Operations: 24/7 Shift Coverage, Incident Escalation, Performance Reporting, Client Communication

Soft Skills: Analytical Thinking, Problem-Solving, Attention to Detail, Ability to Work Under Pressure
